

## COHILLS PRO SERIES® FINAL FINISH

Cohills Pro Series® Final Finish is a high gloss, non yellowing & non-toxic acrylic floor finish for use on all types of sealed floors. It not only dries to a high gloss finish, it can be maintained by spray buffing. Cohills Pro Series® Final Finish is used to maintain floors in a brilliant polished condition with minimum of labor. All types of sealed concrete floors as well as sealed wood and composition floors will improve their appearance and decrease maintenance costs with the use of Cohills Pro Series® Final Finish.

### Product Availability & Coverage

- Cohills Pro Series® Final Finish is available in 1 gallon containers, 5 gallon pails
- Product coverage is approximately 1200 sq. ft per gallon.

### Surface Preparation & Application

Remove old polish thoroughly by scrubbing with Cohills Pro Series® CitraPro. Rinse floor well and let dry completely. Spread Cohills Pro Series® Final Finish in a thin even coat over the floor using a Lambs wool applicator or a clean finish mop. Allow to dry completely, about 25 to 30 minutes. Apply a second coat and let dry completely before allowing traffic on the floor. Damp mop with a neutral detergent as required and burnish regularly to restore the wet look. In high traffic areas, damp mop and apply a touch up coat of Cohills Pro Series® Final Finish as required. No stripping is necessary before re-coating.

**Spray Buffing:** Dilute 1 part of Cohills Pro Series® Final Finish with 3 parts of water. Using a Trig Mist sprayer, mist lightly over a 1 sq. meter (10 sq. ft.) area and buff with a polishing pad until all liquid disappears and a brilliant shine appears. Repeat this until the entire floor is renovated and polished.

**Maintenance:** Occasional damp mopping with a neutral detergent will maintain the smooth glossy surface. In Heavy Traffic areas, after mopping and rinsing, let dry and apply a thin coat of Cohills Pro Series® Final Finish.
