

SkateBlock® Skateboard Solutions

FROM RAVENSFORGE

PROBLEM:

Facility, building and property managers spend thousands repairing damage done by skateboards and in-line skates.

SOLUTION:

A product that secures easily to out door public areas to reduce damage and costs associated with security, lighting and potential injuries.

At almost every urban commercial building, exterior public areas are at the mercy of those people who use them. Simple maintenance has always been an issue, but now with the increased popularity of skateboarding and in-line skates, many of these attractive public areas have become unsightly, pock-marked and uninviting.

But now a simple invention can provide unobtrusive deterrence while protecting benches and walls. In addition, they help reduce the possibility of personal injury to pedestrians from out-of-control skateboarders by stopping the activity in crowded public areas. (Property owners are often liable for any injury to a third party person)

Wheels from skateboards and in-line skaters cause unsightly damage. Some skateboarders even wax the bench edges before the practice their stunts. After a few hot days, the wax 'becomes one' with the bench and is virtually unremovable.
